What people have said (via linkedin)

Jon Herbert
Creative Manager at Pentland Brands

'... Andy is one of those hard to find Senior Creative Designers with skills in both Digital and Traditional Media. These well-rounded skills formed to create a fusion of conceptual web design and creative use of front-end development technologies.'

Paula Fanning
Head of Design at ITV

'... He is proactive and is a great communicator so you always know where you stand with him which is really important in a hectic environment like ITV. Andy is rock solid and i would back him up 100%.'

Matt Johnson
Developer at Government Digital Service

'... here's a designer who, along with the usual creative nous and flair you'd expect, possesses an almost hyper-real capacity for sheer accuracy and detail.'

As a front end web developer, I've always found Andy's work to be in that zen state where "nothing is off" - can't say better than that.'
